SUMMARY

Designer & developer with 4+ years across UI/UX, 3D and frontend for Web3 products, now building AI-powered web applications with Python, FastAPI, React and AWS. Ships end to end, from interface design to a deployed serverless backend.

PROJECTS

AccessAudit AI

AI Accessibility Auditor (Python, FastAPI, JavaScript, AWS)

- Turns UI screenshots into WCAG 2.2-based audit reports with severity-ranked findings, fixes and an executive summary.
- Validates AI output with Pydantic and calculates scores in code, so the same findings always give the same score.
- Deployed serverless on AWS Lambda and S3, with every audit saved to DynamoDB and shown in a history dashboard.

PolicyLens AI

Policy Gap Checker (React, Vite, Tailwind, Python, AWS)

- Checks policy PDFs against a fixed 10-point GDPR checklist, with evidence quotes and "human review needed" flags for uncertain findings.
- Keeps the checklist in code so the AI cannot invent requirements, and stores no PDFs.
- Accessible, responsive interface with dark and light themes, designed for WCAG 2.2 AA.

JE Guard

Journal Entry Testing (Python, Gemini, AWS)

- Runs standard journal entry tests (after-hours, weekend, duplicates, round amounts, self-approval, near-threshold) on a general ledger CSV and scores each entry.
- Checks required columns before upload, writes an AI executive summary, and lets a reviewer accept or dismiss each flag.

EXPERIENCE

Freelance Designer & Developer

Web3 startups 11/2023 – Present

- Delivered web design, UI/UX, 3D and frontend work for early-stage Web3 startups.
- Built Solana product frontends in Next.js and TypeScript, owning design to production.
- Learned Python, JavaScript, AWS and LLMs; built three full-stack AI projects.

3D & UI/UX Designer

Rario 06/2022 – 11/2023

- Created 3D designs and UI/UX for Rario's digital products.
- Contributed to the complete redesign of Rario's website and app.
- Worked on NFT production, 3D pack design and product delivery.

NFT Designer

WazirX 10/2021 – 04/2022

- Designed NFTs, wrote the copy for each one and promoted them on Twitter.

Design Intern

7 Classes 03/2021 – 06/2021

- Designed and prototyped learning experiences for web apps.
- Created icons and illustrations used across the product.

CLUB & DESIGN CHALLENGE

Monday Morning (Club Activity)

Graphic Design & Web Development 01/2019 – 06/2021

- Handled graphic design for web projects.
- Built and delivered the website, covering both design and development.

CoNo (UMO Design Challenge)

UX Research & Prototyping 03/2021 – 06/2021

- Designed wireframes, interfaces and prototypes for a cross-device platform.
- Ran user research to shape design decisions.
